CAREER OBJECTIVES

Motivated and detail-oriented Artificial Intelligence and Data Science graduate with strong skills in Python, Machine Learning, Deep Learning, and Web Development. Seeking an entry-level Software Developer or AI Engineer position where I can apply my technical knowledge, problem-solving abilities, and innovative mindset to contribute to organizational growth while enhancing my professional skills.

EDUCATION

B.E. in Artificial Intelligence and Data Science 2022–2026

Angadi Institute of Technology and Management, VTU, Belgavi

CGPA: 8.9

Pre-University Course (PUC) 2020–2022

VVS Independent PU College, Hospet

Percentage: 66%

SSLC 2019–2020

Govt Girls High School, Kamalapur

Percentage: 89.92%

PROJECTS

Major Project

AI-Powered FNAC Breast Cancer Detection

- Built a CNN-based deep learning model achieving 92% classification accuracy.
- Implemented image preprocessing and feature extraction using OpenCV.
- Developed an AI-assisted diagnostic system for automated breast cancer detection from FNAC images.

Mini Project

AI-Based Automated Fashion Design System

- Developed a machine learning-based fashion design generator based on user preferences.
- Applied AI techniques to generate customized design recommendations.
- Secured 3rd place in the Ingenious Society Project Competition.

INTERNSHIP EXPERIENCE

Python Full Stack Developer Intern January 2026 – Present

Pentagon Space (Offline Internship)

- Gained hands-on experience in Full Stack Web Development using Python, Django, HTML, CSS, JavaScript, Bootstrap, and MySQL.
- Learned backend development, database integration, frontend design, and REST API concepts.
- Worked on developing responsive web applications and implementing CRUD operations.

- Collaborated with mentors and team members to understand software development life cycle (SDLC), debugging, and version control using Git.

Project Developed During Internship: Job Portal System

- Developed a Job Portal System using Python, Django, HTML, CSS, JavaScript, Bootstrap, and MySQL.
- Implemented user authentication, job posting, resume upload, job application, and application tracking modules.
- Designed and integrated frontend and backend components with database connectivity.
- Built a responsive and user-friendly interface for job seekers and recruiters.

SKILLS

Technical Skills

Programming	Python, SQL
Web Technologies	HTML, CSS, JavaScript, Bootstrap
Machine Learning	CNN, Deep Learning, NLP, Computer Vision
Frameworks/Libraries	React JS, Django
Databases	MySQL
Core Concepts	Data Structures
Visualization Tools	Power BI, Tableau
Tools	Git, VS Code, Google Colab

Leadership & Soft Skills

- Project Leader – Led cross-functional teams for AI-based academic projects.
- Placement Coordinator – Managed placement communication and coordination.
- Event Management Coordinator – Organized technical events.
- Strong Communication and Presentation Skills.
- Teamwork, Problem Solving, Time Management, and Adaptability.

CERTIFICATIONS

- Data Analytics Job Simulation – Deloitte (Forage)
- Data Visualisation – Deloitte
- The Joy of Computing Using Python – BE Honours
- Cloud Computing – BE Honours
- AI Search Methods – BE Honours
- Common Internship Test (CIT)

ACHIEVEMENTS

- Secured 3rd Place in the Ingenious Society Project Competition for the AI-Based Automated Fashion Design System.
- Achieved 92% accuracy in the AI-Powered FNAC Breast Cancer Detection project using CNN.
- Successfully completed a Python Full Stack Development Internship at Pentagon Space.
- Participated in technical workshops, hackathons, and AI/ML project exhibitions.
